**Public Comment Summary Report: Substandard Road Project- Cardinal Hill Unit 15 and Cardinal Hills Unit 16**

Thank you for participating in the in-person Open House held on July 27, 2026, and the Virtual Open House held from July 27, 2026, through August 7, 2026.

The following responses address the paraphrased comments and questions received during the open house events.

1. **Only a few roads in the neighborhood are included in the current project, even though there are several other substandard roads that are highly deteriorated, limiting access for school buses, delivery vehicles, and emergency services. Why are only a few roads considered in the current project, and what is the plan for the remaining roads?**

   *The Substandard Road Improvement Program is an ongoing County initiative. County's plan is to improve all substandard roads within the neighborhood through future phases of the program. The limits of the current project were established based on available funding and the County's adopted ranking criteria.*

2. ***Speed is a concern throughout the project limits. Speed signage or traffic calming measures should be implemented to help control speeding on these roads.***

   *Speed limit signs will be posted along geometrically constrained sections of the roadway, and additional measures will be considered in the future if warranted.*

3. **Will notice be provided before requiring the removal and relocation of private improvements such as fences, gates and other items currently located within the public right-of-way?**

   *Yes. Residents will be provided with advance notice prior to construction activities. Travis County requires that private improvements located within public right-of-way or easements be removed or relocated at the property owner's expense.*

4. **Is the County planning to remove most of the trees within the right-of-way due to the limited ROW width?**

   *Trees within the construction limits with conflict will only be removed.*

5. **Would it be possible to include water supply improvements as part of the project?**

   *Water supply improvements are outside the scope of this project.*

6. **Would it be possible to maintain these roads until construction begins?**

   *Substandard roads are not part of the County-maintained road system. Therefore, these roads will not be maintained until construction is completed and accepted by the County.*

7. **Will the driveways be removed for drainage and roadway improvements?**

   *Yes, most driveways will be removed up to the right-of-way limits; however, they will be replaced by cement concrete or asphalt concrete as appropriate.*

8. **What is the estimated start date for construction?**

   *Construction date is yet to be finalized; however, construction is currently anticipated to begin during the third quarter of 2027.*

Thank you,

Sandeep Pandey
Travis County Substandard Road Improvement Program Manager
