About this guide

Please consider talking to your doctor about prescribing one of the formulary medications that are indicated as covered under your plan; which may help reduce your out-of-pocket costs. This list may help guide you and your doctor in selecting an appropriate medication for you. The preferred medication list, also known as a formulary, is updated on a regular basis. You can view the most up-to-date list at rightwayhealthcare.com.

Contents

Introduction	3
Coverage considerations	5
Formulary listing	6
Index	82

Introduction

The Rightway Formulary serves as a guide for the selection of medications that are clinically and therapeutically appropriate. The drugs listed have been reviewed by a National Pharmacy and Therapeutics (P&T) Committee and are approved for inclusion.

Generics

Generics drugs are shown in lower-case *italics* type.

Brands

Brand prescription drugs are shown in **CAPITAL** letters with boldface type.

The Rightway Formulary is organized into broad categories (e.g. Anti-Infective drugs). Within most categories, drugs are sub-grouped by drug class (e.g. Penicillins) or by use for a specific medical condition (e.g. Diabetes). Drugs represented in this document may have varying cost to the plan member based on their specific plan benefit structure.

Generic medications are typically available at the lower cost, brand-name medications will generally cost more than generics. To save the most money on prescription drugs, take this drug list with you each time you visit your physician. Consider asking your physician to prescribe generic and formulary drugs listed, if appropriate.

Please note, your coverage has limitations and exclusions, which means that some drugs on this list may not be covered or be covered at a different level, depending on your plan's design. To find out more, please refer to your plan's Evidence of Coverage or your Summary Plan Description.

This is a complete list of prescription drugs covered by your plan as of July 1, 2026. For more up-to-date information or if you have any questions about this information, please contact Rightway at (888) 665-1678.

Your plan will generally cover the drugs listed here as long as the drug is used for a medically accepted indication, the prescription is filled at a network pharmacy, and benefit plan rules are followed. However, this list is not a guarantee of coverage, and where differences exist between this list and your benefit plan, the benefit plan documents rule.

While most changes to this formulary list will take place January 1st and July 1st of each year, we may add or remove drugs from this formulary list during the year, move them to different cost-sharing tiers, or add new restrictions. You will receive notice of these changes as required by law and the plan documents. The most up-to-date formulary information can be obtained by contacting us directly at (888) 665-1678.

If the US Food and Drug Administration identifies that a drug is not safe or effective or the drug's manufacturer takes a drug off the market, we may immediately take it off this list. Your benefit plan may alter coverage of certain products or vary cost-sharing amounts based on the condition being treated.

Drug products listed here are for informational purposes only and are not intended to replace the clinical judgement or your doctor or prescriber.

Coverage considerations

Maintenance medications

Drugs you may take on an ongoing basis for conditions such as high blood pressure, diabetes or high cholesterol are considered maintenance medications. Some plans may exclude coverage for certain agents or drug categories, like those used for erectile dysfunction or weight loss.

Over-The-Counter Exclusions

Your benefit plan may not provide coverage for prescription medications that have an over-the-counter version.

Compounded Medications

Your benefit plan may require Clinical Review for prior authorization for compounded medications or they may be excluded.

Repackaged Medications

Repackaged versions of medications already available on the market are not covered.
