Capital Improvement Projects

Capital Improvement Projects (CIP) include the cost of buildings and other structures, infrastructure and capital-related additions, alterations, reconstruction, and installations that have a value of \$5,000.00 or more and an estimated useful life greater than one year. The Transportation and Natural Resources Department (TNR) works primarily with infrastructures, which are long-lived capital assets that normally are stationary in nature and can be preserved for a significantly greater number of years than most capital assets. These include the construction of new or reconstruction or improvements of existing facilities that may fall under one of the following:

- New parks development
- Major drainage improvements
- Roads
- Bicycle lanes
- Sidewalk and other pedestrian facilities
- Expansion of the County's bridge system
